

MicroMain

Software for Manufacturing

Since 1991, manufacturing sites—from off-shore oil producers to warehouses to consumer product manufacturers—have been using MicroMain™ software to manage their maintenance and facility operations.

Maximize Equipment Uptime

To ensure equipment reliability, you need to be able to respond quickly to requests for repairs. With MicroMain, you can identify the right labor and parts and immediately issue work orders. MicroMain also allows you to schedule preventive maintenance with an easy calendar control. From drill presses to centrifuges, MicroMain will keep your equipment available.

Meet Production Goals

Whether you manage one plant or multiple plants around the world, you can use MicroMain to:

- Control operating costs
- Reduce inventory
- Keep equipment working at capacity
- Optimize preventive maintenance
- Increase productivity

Manufacturing plants can maximize output and minimize downtime and waste with MicroMain.

Organize Data and Operations

By equipment, department or site, you can use MicroMain to track:

- Costs—track parts, purchases, and labor costs
- Maintenance—streamline your maintenance practices and work orders
- Time—track labor hours, overtime costs, and time spent per work order
- Productivity—manage multiple areas in the most productive way

Project Budgets Accurately

Detailed cost and time reports in MicroMain, including total cost of ownership, will give you the drill-down data you need to accurately project budget needs. These reports will help you evaluate productivity and make adjustments to improve labor utilization. You can also show extended asset life based on preventive maintenance, reducing emergency purchases and overtime costs.

Work Efficiently

With MicroMain software, you can work more efficiently with Pocket PCs, phones, and other handheld devices for work orders, inspections, and inventory control. You can also:

- Use labor timesheets
- Track tools and keys
- Use data-enabled drawings for space planning
- Track assets and personnel visually
- Catalog deferred maintenance needs
- Assess facility conditions
- Develop capital plans

MicroMain's flexible features and customizations give you simply everything to manage your manufacturing sites—simply.
